Call for Papers

Special Session on Real-World Data Mining Applications, Challenges, and Perspectives

Organizer: Mahmoud Abou-Nasr, Adjunct Faculty at the University of Michigan Dearborn, CIS Department (Computer & Information Systems), abounasr@umich.edu

Thematic Calls:

The past decade has witnessed a vast growth in the amount of data produced and the proliferation of specialized databases in a wide range of business, industrial, medical, and scientific applications. Data mining is becoming an increasingly important tool in the process of knowledge discovery and the transformation of data into valuable information. This special session aims to provide a forum for data mining researchers and industrial practitioners to discuss data mining applications, issues, and the challenges that arise when addressing real-world problems.

Topics of interest include, but are not limited to, the following:

- Enterprise knowledge management/knowledge discovery
- Corporate Planning
- Direct Marketing
- Credit scoring
- Forecasting
- Automotive applications
- Medical decision making, diagnostics
- Bioinformatics
- Text- and image recognition

Challenges to be addressed include but are not limited to:

- Highly skewed data sets
- Massive and high dimensional data sets
- Non-stationary data
- Unknown misclassification costs
- Missing and noisy data
- Business process issues

Submission: All manuscripts should be submitted via the standard online submission process for ICDATA conference. Please have a look at the [ICDATA website](#) and in particular at the info on submissions. During the submission process, please select the track: '**RWACP - Special Session (Real-World Data Mining & Data Science Applications, Challenges...)**'.

Publication: All accepted papers will be published in printed conference books/proceedings ([IEEE CPS](#)).

Date and Venue: The special session will be held at the ICDATA'24, July 22–25, 2024 at the Luxor (MGM) in Las Vegas, Nevada, USA.

This year's Congress will be a hybrid event that combines a "live" in-person event with a "virtual" online component. We anticipate that most speakers will physically be attending (ie, most talks are expected to be face-to-face). Further information is published on the website.

Questions: In case of further questions or assistance, please get in touch with the special session organizer via abounasr@umich.edu or the ICDATA conference organizers via chair@icdata.org.
